

RAPID ESTIMATOR PRO EDITION

Backup and Restore

The backup feature lets you create a backup file on your hard drive, on a network drive or even a flash drive. To backup your data open the Rapid Estimator Pro Edition program

- After login, click on the 'Utilities' tab, and select 'Backup Database'.
- Select the 'Browse' option to locate the location you would like your backup to be store.
- Once you have selected your location click 'Ok' and then select 'Backup'
- When ready to restore your program on this computer or another computer, simply open the program and click 'Utilities'
- Select the 'Restore Database' option.
- Select the location of your backup and click 'Restore'
- The program will close automatically, reopen, login and verify it has been restored
